

12V Universal Heated Seat Cushion

Usage Instructions

Read and follow the safety instructions/information below before any/every use:

Place the elastic strap on the back of the heated cushion over car seat. Ensure that the heated cushion is seated correctly and held in place using the elastic strap.

To operate simply plug into a vehicle 12V power socket and select "Hi" & "Lo" settings to heat both seat and back areas using the switch (below).

Do not use the seat cushion if any straps or other parts of the product are missing or damaged.

Make sure the seat cushion does not fold over on itself, NEVER fold this product when in use as this can cause overheating.

Never leave the seat cushion unattended when connected to a 12V power supply.

Always unplug the seat cushion from the 12V power socket when not in use.

Ensure 12V socket is clear of any dirt, dust or corrosion and the plug is connected securely before every use.
