

12 Volt Heater & Defroster

SWCH500

Operation Instructions

NOTICE: To prevent blowing a fusible link on the Power Socket, only use with 15 Amp rated Power Socket receptacle.

1. Place the Power Switch in the O (off) position. Plug the 12V Power Socket into the vehicle's 12V Power Socket receptacle.
2. The Heater can be removed from the Mounting Base. By holding the Handle and sliding it off the base plate. The Heater can be moved around as needed on the ball and socket joint.

3. To operate, press the Power Switch to I or II depending on the strength of the heat required. Toggle the Power Switch to the center position to turn off (O).

WARNING! Do not operate longer than 15 minutes at one time, allow heater to cool completely after use.

4. Unplug the Heater before leaving the vehicle.

Please read and understand these instructions before any use of this product and retain for future reference.

Important Safety Information

1. **This product is not a toy.** Do not allow children to play with or near this item.
2. The Heater's base can be mounted to the vehicle using Mounting Screws or the Adhesive Strip as desired.
3. Verify that installation surface has no hidden wires or other components before drilling or driving screws.
4. Do not mount or use when tired or when under the influence of alcohol, drugs or medication.
5. **Do not exceed the vehicle manufacturers rated fuse capacity in the Power Socket circuit at all times.**
6. **Do not leave heater plugged in while starting vehicle or while vehicle's engine is off. Low voltage during these circumstances will increase heat in the wiring and may blow the fusible link in the receptacle or another fuse.**
7. **Check vehicle manual to ensure the Power Socket receptacle is rated at 15 Amps or greater. Do not use a socket extension or pigtail to operate this Heater.**
8. **Only use this Heater for up to 15 minutes at a time, and allow to cool between uses. Do not operate other 12VDC appliances at the same time.**
