

# Porta Shower SWSHO

**A portable shower system. Ideal for Camping & Caravanning.**  
**For use with a 12v vehicle power socket or any portable 12v power source.**

## Usage Instructions:

1. Attach shower head to hose (using washer supplied) in storage bag.

2. Immerse the pump in a suitable water supply, (bucket or container).

3. Plug the shower into a suitable 12v power source.

4. Turn ON using the in-line ON/OFF switch.

5. Adjust the water pressure using the button on the shower head.

6. Storage bag, hanging hook, suction cup & shower head bracket included.

## Caution:

Do not use this portable shower with any liquid other than water.

Do not remove the pump when it is running from the water. The pump will not run properly when it is re-immersed in water.

If water does not flow when the pump is switched on.

A) Turn shower off.

B) Hold the shower hose vertically out of the water and allow all water to drain out.

C) When all water has drained, re-immers the pump in the water and turn on.

Regularly clean the foam filter (which is situated in the end of the pump). Unscrew the vented cap.

Remove the foam filter and rinse in clean water.
