

# Phone Holder

**Never position the phone holder in a place that obscures the view of the driver.**

Will fit smartphones between 49mm & 82mm wide.

## Intention for Use

This product is intended for ONLY holding smartphones only between the width of 49mm to 82mm. This gadget holder can be mounted in three different ways: vent-clip mount, dashboard mount & windscreen suction mount.

To get the best use of this product, we advise that you read all information in this document.

## Product Elements

1. Streetwize Universal Car Smartphone Holder (with attached suction mount)
2. Adhesive pad for dashboard mount
3. Vent-clip mount

## Mounting the gadget holder

As mentioned, this product can be mounted in three different ways. Please follow the instructions for your preferred mounting option.

### 1. Windscreen Suction Mount

The windscreen suction mount option already comes attached out-of-the-box. To use this option, simply unfold the gadget holder as shown in Figure 1.

Mount the suction cup to your windscreen. Ensure the gadget holder is unfolding towards you and not facing downwards towards the windscreen. Secure the suction mount in place by turning the knob behind the suction cup clockwise (see Figure 2).

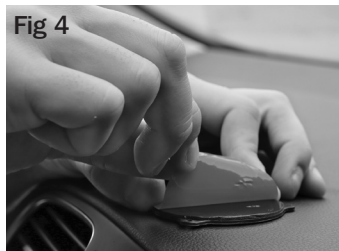

Then place your phone into the adjustable grip (Figure 3). The support arms are spring loaded, simply pull apart to the required width of your phone and adjust the angle to your requirements. With the suction mount, you can rotate the device to view your device either horizontally or vertically.

To remove the suction mount from your windscreen, simply turn the knob anti-clockwise and pull one of the tabs on the suction cup.

## 2. Dashboard Adhesive Mount

To mount the gadget to your dashboard, remove the adhesive protection film from the supplied pad (Fig 4) and position it on to the suction pad of the phone holder.

Position the holder as required on the dash board (Fig 5). To secure in place, screw the phone holder to the dash using the three screw holes (screws NOT supplied).

Then place your phone into the adjustable grip and adjust as required.

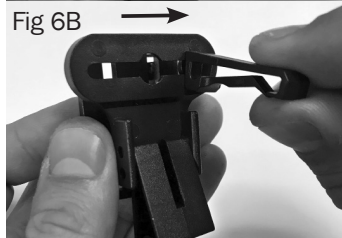

## 3. Vent-Mount Clip: Please note, the phone holder will not rotate when using the vent-clip.

You will need to remove the suction cup mount from the phone holder. Hold the device as per Figure 6 and position your thumbs behind the adjustable arm of the holder. Push your thumbs forward until you hear a click, the suction cup can now be removed.

Assemble the vent clip by positioning the vent grips (3) as shown in Figure 6A. Simply place the attachment end of the vent clip through the hole in the middle and slide either left or right (Figure 6B).

Then attach the vent clip to the gadget holder (Figure 7). Using the vent-clip mount, place the gadget holder on to your vehicle's vent. Ensure the vent clip is secured around the vent bars and the hinged bottom support should be secured into

one of the vent bars at the bottom as shown in (Figure 8)

Mount your phone horizontally.

### **Manufacturer's Warranty**

This product comes with a 12 month manufacturer warranty which starts on the date of purchase. **For any warranty queries, please contact the retailer where you purchased the product.**
