

LWACC488

Ideal for preventing problems with mould, mildew and peeling wallpaper

Setting Up:

Separate the vented top from water tank base and remove both sealed bags of crystals. Re-attach the vented top to the water tank base and secure. Remove the small lid on the vented top, open one bag of crystals and pour them through opening into the vented top. Replace the small lid on the vented top. Your moisture trap is now ready for use. Retain the second bag for use later.

Using and Refilling:

During normal usage water will fill the base unit. The trap will work for 6-8 weeks depending on the level of moisture in the room. When the crystals have nearly disappeared and the water tank is near the REFILL level dispose of the contents in the container. Repeat 'Setting Up' process with the second bag.

WARNING

Read and understand these warnings before use.

- Keep out of reach of children.
- Causes eye irritation.
- Avoid contact with skin and eyes.

- Wash your hands thoroughly after handling.
- IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses if present and easy to do so, continue rinsing. If irritation occurs seek medical attention.
- IF ON SKIN: Wash with plenty of soap and water.
- Do not inhale dust.
- Place in stable position.
- Calcium chloride has a great affinity for water and very readily absorbs atmospheric moisture, so drying the surrounding air.
- The liquid formed in the lower half of the trap is mildly caustic.
- Prevent spillages by placing in a secure position out of reach of children and animals.
- If spillage does occur, mop up affected areas immediately. Apply warm, soapy water and rinse thoroughly.
- Dispose of contents / container in accordance with local regulation.

Contains calcium chloride. EEC No: 233-140-8
