

12v In-Car Travel Kettle

*Including
accessories*

Please read and understand these instructions before operating this travel kettle and retain for future reference.

Contents:

Kettle
Mounting bracket
Height adjustment insert
2 drinking cups, fork and spoon
Power cable and plug

Technical info:

Voltage: 12v
Power consumption: 100 watt
Current consumption: 8A
Kettle water volume: 700ml
Cable length: 1.4m

WARNING: Use kettle with cigarette lighter only (10-15 Amp).

SAFETY INFORMATION: NEVER use the appliance if damaged in any way. This product is NOT a toy, therefore the appliance should never be left unattended when plugged in. Store the kettle out of reach of children. ALWAYS unplug the appliance immediately after use and allow to cool before putting on or taking off parts and touch handle only. NEVER fill kettle above the MAX mark or below the MINIMUM mark. Under no circumstances should the kettle be plugged in without water inside. Only use clean, fresh drinking water. Unplug the kettle before filling, pouring or cleaning. The kettle must NEVER be used whilst driving.

PLEASE NOTE: In case mounting bracket is bent, always ensure the bracket and kettle are secure before adding any water then safely slide it into the window opening.

If you use the kettle to heat baby food, place the hight adjust insert into the kettle and place baby food container on top. Add water to the level required before plugging in the kettle.

Operating Instructions:

1. Open the lid with anti-clockwise turn.
2. Fill the unplugged kettle with clean water between the MIN (300ml) and MAX (700ml) marks.
3. Replace the lid and lock with a clockwise turn. Connect the kettle to the vehicle 12v power socket (cigarette lighter). The operation light will illuminate to indicate water is warming.
4. When water is boiling, or if the water has reached the required temperature, unplug the kettle immediately.
5. Rotate the lid anti-clockwise to the middle position to pour the hot water taking care not to spill.

Cleaning:

1. Always ensure the kettle is disconnected from the 12v power socket before cleaning.
2. Wipe the outer surfaces with a soft, damp cloth when the kettle is cooled, and dry is necessary.
3. To de-scale the heating element (dependant on water hardness) use a standard de-scaling agent and follow the manufacturer's instructions carefully.
