

Car to Car Charger/Jumpstart

Welcome

This product has been carefully engineered and manufactured to give you dependable operation. Please read this manual thoroughly before operating your new product as it contains the information you need to become familiar with its features and obtain the performance that will bring you continued enjoyment for many years. Please keep this manual on file for future reference.

IMPORTANT

PRIOR TO USE, READ AND UNDERSTAND ALL WARNINGS, CAUTIONS AND INSTRUCTIONS INCLUDED IN THIS INSTRUCTION MANUAL, AND THOSE PUBLISHED BY YOUR VEHICLE BATTERY MANUFACTURER AND MANUFACTURER OF ANY DEVICE INTENDED TO BE USED WITH THIS UNIT. RETAIN THESE INSTRUCTIONS FOR FUTURE REFERENCE.

WARNINGS:

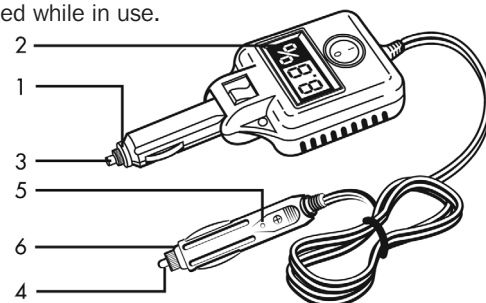

- Read and follow all precautionary instructions.
- Do not submerge unit in water or expose the Quick Boost to high moisture.
- Keep away from direct sunlight or heat. Store in a cool/dry area.
- Unit will not operate on vehicles with damaged electrical system.
- Always place both vehicles "DONOR VEHICLE" and "RECIPIENT VEHICLE" in the transmission "PARK" or "NEUTRAL" position with the manual parking brake applied.
- Keep charging cable clear of vehicle mechanical controls. Ensure charging cable does not interfere or obstruct either vehicles (DONOR AND/OR RECIPIENTS) steering, transmission, acceleration or braking system.
- This product has no consumer serviceable parts except replaceable fuses.

CAUTIONS:

- This is not a toy. Keep out of reach of children
- Never leave the Car to Car Charger unattended while in use.

CHARGER FEATURES

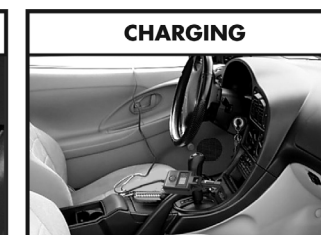

1. Recipient Power Plug
2. Digital Battery Meter Display
3. Recipient Power Plug Fuse Location
4. Donor Power Plug
5. Donor Power Plug LED indicator
6. Donor Power Plug Fuse location

OPERATIONS:

1. Park donor vehicle (vehicle with the good battery) adjacent (side by side) to the recipient vehicle (vehicle with the depleted/weak battery).
2. Place both vehicles in PARK or NEUTRAL position and set the emergency brake. **WARNING:** Ensure recipient vehicle is in transmission "PARK" or "NEUTRAL" position with manual parking brake applied.
3. Turn "OFF" all accessories from both the "donor" vehicle and the "recipient" vehicle. (ie. Radio, dome lights, air conditioning, heater, etc.)
4. Start the engine of the donor vehicle (donor vehicle with the good battery).

5. Turn the ignition key of the recipient vehicle (recipient vehicle with the depleted/weak battery) to the ACCESSORY or NEUTRAL position, but DO NOT ATTEMPT TO START THE ENGINE.
6. Connect the donor power plug to the jumper vehicle.
7. Plug the recipient power plug into the vehicle to be jump started.
8. Leave the ON/OFF (I / O) button to "O" position, it will show the recipient vehicle's battery capacity in %. The battery has to recharge immediately when it shows "LO".
Please Note: If the display does not show any figure, the recipient vehicle's battery is defined as dead, it cannot be recharged. Please call for the technician for new battery replacement.
9. Press the ON/OFF (I / O) button to "I" position, the display will show the charging level going up. Charge until it shows over 20%.
10. Press the button "O" position again, when the display keeps over 20% means it's ready to start.
NOTICE: Charging time depends on the condition of the recipient vehicle's battery. Typical charge time will take approximately 15 minutes, but no more than 45 minutes. The Car to Car Charger will not operate on vehicles with damaged electrical systems.
11. Disconnect both power plugs and then start your vehicle. **WARNING: Power Plugs must be disconnected before starting the vehicle. If vehicle engine does not start after the second attempt, seek professional automotive service.**
12. Allow the Jumpstarted vehicle engine to run for 30 minutes, so that the battery will recharge completely.
13. Wrap and store unit.

SPECIFICATIONS:

- Input Voltage: 12 Volt DC Nominal
 Output Voltage: 12 Volt DC Nominal
 Rated Fuse: 10 AMP
 Power Cord: 6 Meters
