

LWA40 Pop Up Free Standing Inner Tent Instructions for Use

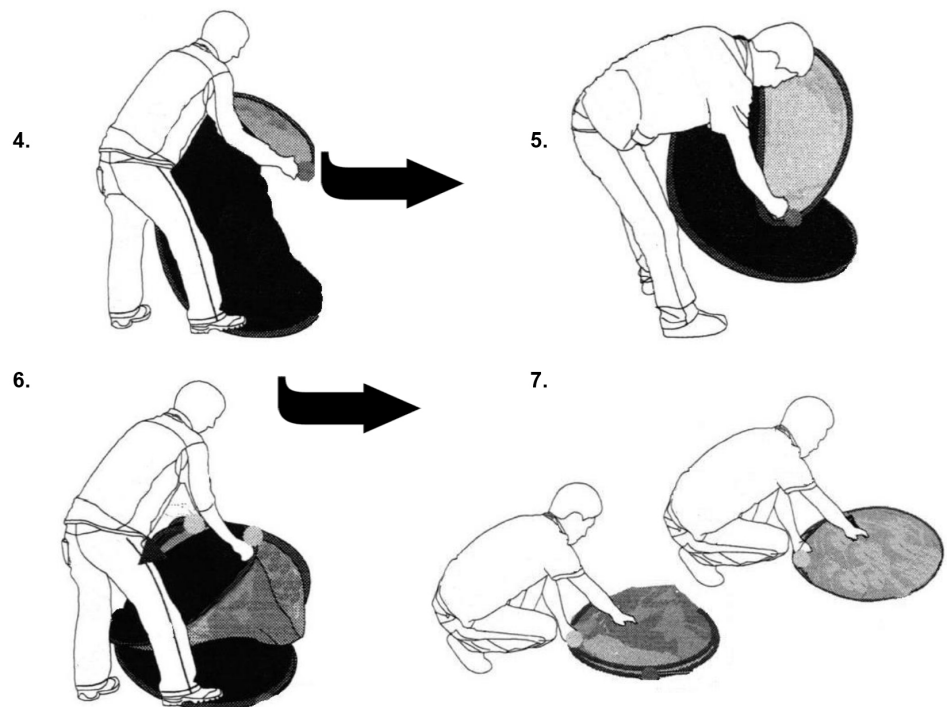

Pitching

- Remove the Inner Tent from the bag.
- Once removed from bag release the frame and allow the tent to 'pop up' and take its shape
- Peg out the four pegging points around the base. Always push pegs into the ground at a 45° angle

Folding Away

- Open both the inner and outer doors to allow air to escape whilst folding away your inner tent
- Put the sides of the tent together, folding the groundsheet between the hoops
- Keep the two loops gathered in one hand and rest the inner tent on its end.
- Press the tip of the upper loop towards the ground and tuck it upwards, inside the new loop that is forming (see point 4 & 5)
- Keep pressing downwards with the hand that has been holding the two loops together. As you press downwards new loops will form on either side. Assist these loops to fold over each other and then align the loops together and place the inner tent into bag.
