

# Solar Moon Wall Planter

Thank you for purchasing this Solar Moon Wall Planter from Streetwize Garden. The instructions written below provide you with guidance on how to get the best use out of the product. We highly recommend reading these instructions before using the product.

---

## Before First Use

Remove the protective film from the solar panel.

---

## Charging & Operation

This solar planter comes with a solar panel situated at the top. During the day, the panel absorbs solar energy to charge the included rechargeable battery. At night, the LED light automatically illuminates.

**Before using this product for the first time, we advise that you fully charge the battery by placing the planter under direct sunlight for a full 24-hour period.**

1. There is an ON/OFF switch on the top of the solar pane case, Push the switch to ON position. Then position the light in a sunny location.
2. Charge the solar product by placing it under direct sunlight for at least 8 hours.
3. The light will work automatically. It will charge under direct sunlight during the day time and illuminate at night.

NOTE: In order to test the light simply cover the solar panel with your hand and the light should turn on automatically.

---

## Important

1. Install the solar product in an area where it can get direct sunlight.
2. Leave the switch to the “ON” position.
3. Place the solar light in a location that is away from other light sources at night, such as street lights. Artificial lighting may prevent the product from turning on automatically at night.
4. Duration of solar light illumination depends on the solar product’s level of sunlight exposure, geographical location, weather conditions and the hours of daylight.

---

## Maintenance and troubleshooting

1. Make sure the switch is in the “ON” position.
2. Keep the solar panel clean.
3. If a solar product does not light up after it has been used for around 8 – 12 months, replace the rechargeable battery as it may be weak or worn out. (Battery 1 pc AA 1.2V 300mAh Ni-MH Rechargeable). Never use another battery with a different spec.

---

## Battery Replacement

1. Unscrew the battery compartment cover by using a Phillips head screwdriver (not included).
2. Remove the exhausted battery and install 1 new AA 1.2V 300mAh Ni-MH rechargeable battery according to the +/- polarity. Open the compartment carefully and ensure that the wire inside the battery terminals is not damaged.
3. Replace the battery compartment cover, screw it back into position and make sure it is properly sealed.

**Attention: Batteries must be recycled or disposed of in accordance with your local authority guidelines. Do not dispose of these near an exposed heat source, an open flame, or in your normal household waste. If you plan to store the product for an extended period, remove the battery from it. Removal or replacement of the battery should only be done by an adult or with adult supervision.**

## Health & Safety

- Do not use the device if the insulation or bulb are damaged.
- Never allow the product to come into contact with excessive heat or naked flame.
- This product is not intended for use by children or individuals with reduced physical, sensory, or mental capabilities unless supervised by a responsible adult. Small parts may present a choking hazard. Always keep out of reach of children.
- When disposing of this product, please do so in line with your local authority guidelines.

---

## Technical Specification

<b>Name</b>	Solar Moon Wall Planter
<b>Supplier Code</b>	GW562
<b>LED Light</b>	1x White
<b>Battery</b>	AA 1.2 V 300mAh Ni-MH rechargeable battery
<b>Size</b>	Diam. 25cm x (D)12cm
<b>Solar Panel</b>	Polycrystalline
