SWG20

Wireless Car Phone Charger Vent or Dash Fit

Read and understand these instructions before attempting any operation of this phone charger and retain for future reference!

Specification

Input: 5.0V-2.0A
 Output: 5.0V-1.0A
 Frequency: 110-205kHz
 Charging Distance: ≤10mm
 Conversion: ≥72%

Mounting of wireless car charger

Place the mounting bracket required (dash or vent fit) into the slot on the back of the SWGH20, then push upwards to secure.

To mount to the dash, select a suitable flat area to mount the Wireless Charger (it must be FREE from grease, dust or moisture), remove the adhesive base (A) protective layer from the adjustable bracket and adhere to the dash (pressing firmly for a strong mount).

To secure to a vent, connect the vent bracket as described above, and simply push the vent bracket (B) on to a suitable cross blade on the vent to secure.

To adjust the charger, undo screw adjustment (C) and adjust, then tighten to secure in correct position.

Charging for mobile phones (with Qi Technology)

Insert the 12V USB cable into the socket on the charger (found on the opposite side from the arm release button (C)). Insert the other end of the USB cable into a suitable 12V plug adaptor and connect this to the vehicle 12V power socket. Press button (C) to open the arms of the holder (will fit devices from 60mm to 84mm). Squeeze arms together for a strong secure fit of the device.

Ensure the Qi-technology is enabled on the mobile phone to begin charging (this will be indicated by the mobile phone showing the charging symbol).

Safety Advice

- DO NOT place the wireless charger in a position that may cause interference with the drivers view of the road.
- DO NOT place in water or near fire, There are no serviceable parts DO NOT dismantle.
- DO NOT use wireless charger in high temperature or humid conditions this may damage the circuits.
- DO NOT place too close to any magnetic strips or chips on bank cards.
- Please keep a minimum distance of 20cm between any implantable medical devices (such as Pacemakers and Cochlear implants) to avoid any potential interference with the devices.
- It is advised to keep the chargers out of the reach of children.
