

# *Titan Rear Low Mount* **2 Bike Carrier**

Thank you for purchasing this Titan Low Rear Mount 2 Bike Carrier from Streetwize. This cycle carrier is designed to fit most cars which include hatchbacks, saloons, 4x4s and estate cars. It is perfect for cycling trips and outdoor adventures.

Please note, this bike carrier is designed to fit up to 2 bikes depending on the make and model of your car as well as the size of the bike.

Before using this product, please read all the information in this booklet. Please keep this document for future reference.

SWCC10

## Product Elements

- Streetwize Titan Low Rear Mount 2 Bike Carrier
- Hook straps (x6)

---

## Assembly Instructions

1. Take the product out of the packaging and carefully remove the protective wrapping from the strap buckles (Figure 1).

**Warning: Please take caution when handling the strap buckles. Risk of injury.**

2. With the supplied hook straps, thread each one into its own strap buckle. When threading the strap buckle through, ensure the hook is facing downwards, then press the lever on the buckle and begin to thread the strap through the gap inbetween the grip (see Figure 2) and then thread it through the adjacent gap (Figure 3).
3. Repeat this for each strap buckle.

## Mounting the Cycle Carrier

**Important: It is highly advised that two people are involved in mounting the cycle carrier to your vehicle.**

1. Depending on the shape of your vehicle's boot door, you can either mount the bike carrier upright as shown in Figure 4, or the other way around with carrier clips rotated to the other side.
2. Before mounting the cycle carrier, please ensure each of the hook straps are fully unravelled.

Fig 4

1. Adjust the angle of your cycle carrier to suit the rear side of your vehicle. You will need to rotate the knob anticlockwise on both angular fixing clamps to adjust the angle. Then rotate the knob clockwise to secure in place (Figure 5).

Fig 5

2. To mount the cycle carrier, the hook straps will need to be secured on your vehicle's boot door. The top two hook straps should be secured on the top of the boot door, both side hook straps should be hooked on either side of the door. And the bottom two hook straps at the bottom of the door. Figure 6 illustrates the hook-up points on your vehicle's boot door.

Fig 6

3. Hook the straps of the carrier onto your vehicle's boot door as shown in Figure 7 & 8. You need to open the boot door in order to get the hooks in.

---

## Mounting your bike

1. Once your cycle carrier has been securely mounted onto your vehicle, you can then mount your bike via the carrier clips.

*Please note, this bike carrier is suitable for carrying bikes that have a straight horizontal bar across the top of the frame. Bikes with a curved frame or don't have a straight horizontal bar are not compatible with this cycle carrier.*

2. When mounting the bike, place the top horizontal bar of the frame of your bike into cycle carrier clips, and then secure the strap around the clip as shown in Figure 9. Figure 10 shows the bike being mounted.
